DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim I, drawn to expression vector, classified in class 435, subclass 320.1.
- II. Claims 2-9, drawn to method of eliciting immune response with nucleic acid, classified in class 514, subclass 44.
- III. Claims 8 and 10, drawn to method of producing protein in cell culture, classified in class 435, subclass 69.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I II, and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case group II and III are alternative materially different method of use for group I.

A telephone call was made to Mr. Cooper on 01/17/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
